

FY24 FUNDING REQUEST

Funding to End All Forms of Violence Against Children House SFOPS

Half of the world's children – nearly one billion – are victims of violence annually. More than 8.2 million children worldwide have lost a caregiver due to the pandemic. These children are at increased risk of child marriage, child labor, and other forms of online and offline violence, exploitation, abuse, and neglect.

These vulnerable children need protection and access to essential services that keep them safe now and sustain them long-term.

In order to ensure the continued leadership and influence of the U.S. in the protection of children from violence globally we request the following:

VULNERABLE CHILDREN'S ACCOUNT **\$ 35 Million**

supports USAID's Children in Adversity office to coordinate assistance to orphans and other vulnerable children.

DEPARTMENT OF STATE CHILD PROTECTION COMPACT (CPC) PARTNERSHIP **\$15 million**

The CPC Partnership supports the sustainable development of partner governments' capacity to hold perpetrators of child sex and labor trafficking accountable under the law, provide comprehensive services for child trafficking survivors, and expand child trafficking prevention and awareness.

CHILD MARRIAGE **\$30 million**

for the implementation of a coordinated and comprehensive effort to end child early and forced marriage.
